

George Mason University

Educational & General Budget Policies and Procedures

The following policies, procedures, and guidelines will apply to the administration of your budget during the 2010-11 fiscal year:

1. The original personnel budgets reflect the salaries of all funded positions within your organization as of April 2010. If your organization has a personnel budget, a roster is available in eprint which provides you the detail of your budgeted salary amounts, funded positions and position numbers. Since the Commonwealth of Virginia establishes a position ceiling for the University, as well as a spending authorization limit, no additional positions may be established without the appropriate review, support and approval. Any request to establish additional positions not allocated within the original 2010-11 budget requires a Position Maintenance Form be filled out and faxed to the Office of Budget & Planning at 993-8835. This form can be found at <http://budget.gmu.edu/forms.htm>, under Forms. The Office of Budget & Planning will assign a position number and notify you of that position number as soon as it has been assigned. A position description must be forwarded to the Human Resources Department and the recruitment of the position may begin. Please remember that when establishing a position funded from current budget, both salary and benefits must be covered from the unit's current funding.

Increases in salaries resulting from upgrades, reallocations of positions, or vacancies filled at higher than budgeted rates are to be covered from the unit's budgeted funds. When these personnel changes occur, an adjustment if necessary must be made to transfer the appropriate amount of funding to cover projected costs. The adjustment must cover both salary and benefit costs related to the action. The Office of Budget & Planning will notify you as these transfers are completed. Savings from position turnover remain at the unit level. It is left to the discretion of the Dean, Institute Director or Vice President to determine whether the savings remain at the department level or revert to the unit for support of overall unit priorities.

Each Dean or Institute Director has the responsibility to balance his/her budget overall and will work with departments to allocate full-time, part-time and graduate assistant budget funds as necessary.

2. Due to the fact that fringe-benefit expenses vary by department, we continue as in prior years, to monitor fringe benefits centrally for most departments. Your fringe benefit budget is based upon the average rates for each category of staff. For most Educational & General units, any savings or overages due actual rates varying from budgeted rates will be covered centrally. Fringe benefit savings due to vacancies will be recovered centrally. Certain areas, which are supported entirely through self-generated revenues, must cover all fringe benefit costs. The budgeted fringe benefit rates for 2010-11 are based on costs as set by the state and are:

Faculty	29.40%
Administrative Faculty	30.00%
Classified	38.60%
Part Time Faculty	7.65%
Graduate Assistants	0.00%
Non-Student Wages	7.65%
Student Wages/CWS	0.00%

3. Salary savings, which may be accrued through vacancies and turnovers of staff, will be retained at the unit level, giving the Vice President, Director or Dean the ability to reallocate these savings. Your budget analyst will work closely with you during the year to ensure that any personnel savings are reallocated to reflect changes in your operating plans. Some units have a salary savings requirement in 2010-11, which must be met before funds are reallocated for other purposes.
4. Policies concerning the hiring of hourly wage employees are administered by the Human Resources Office, who should be consulted prior to the appointment of wages staff. Your wage budget may be used for non-student hourly staff, non-College Work Study student employees or overtime worked by either classified or wages personnel. The total amount is pooled in the category "Wages and Overtime" and may be spent on temporary personnel or essential overtime, as you deem appropriate.

You are encouraged to employ student wage staff whenever possible. The use of student wage earners continues to be a major initiative within the University. This utilization of available resources affords students with the opportunity to learn important skills and gives them access to increased financial aid for their education.

5. Your budget may include a College Work Study allocation. The amount shown in your budget represents the total of federal and state funds and equals what students you employ under the program may earn. These funds may not be used for other purposes, and other funds may not be used to supplement the CWS allocation without specific approval by the Office of Budget & Planning.

Please contact the Student Financial Aid Office, to begin the process of recruitment for College Work Study students. Because the CWS program involves restricted federal funds, you may not exceed the CWS budget. Overspending in this category will be offset by a reduction of your non-CWS wages budget.

6. The Direct Expenses (non-personnel) budget is available to cover all expenses other than salaries, wages and benefits. The funds are pooled in your organization to provide you with a maximum flexibility in managing your department.
